Job Title: Professional Land Surveyor

Company: Wolf Water Resources, Inc., located in Portland, Oregon.

Minimum Qualifications: Licensed as a Professional Surveyor in Oregon. Licensure in multiple states a plus (Washington, California, and Idaho).

Summary: Wolf Water Resources specializes in stream and floodplain restoration projects. We are looking for a PLS to expand our survey capabilities to support these projects which require work in densely vegetated stream corridors, using boats for bathymetric surveying, and UAVs. The ideal candidate will possess applied expertise and project management experience for land surveying projects. The candidate will exhibit a collaborative nature with project staff, clients, and subconsultant partners while working in the field and in the office. We work primarily throughout the Northwest and occasionally work in other locations.

Essential Duties, Functions, and Responsibilities

The essential duties, functions, and responsibilities listed below are representative of the knowledge, skill, and/or ability required to perform this job successfully. Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions. Other duties than those listed below may be assigned.

- Field experience is necessary with total stations, handheld spatial data collectors, and RTK GPS along with the various computations.
- Experience writing legal descriptions, preparing easement documents, and creating topographic surfaces using AutoCAD Civil3D.
- UAV (drone) experience desirable.
- Bathymetry data collection experience.
- Proficient in the use of current versions of AutoCAD Civil 3D drafting software;
- Familiarity with GIS software desired.
- Contributes to and leads business development activities (networking, developing scopes of work, leading or assisting in developing proposals, participating in presentations, etc.)
- Actively maintains appropriate licensures and certifications.
- Comfortable with providing internal survey trainings to staff.

Competencies

- Analytical - Synthesizes complex or diverse information; Collects and researches data; Uses intuition and experience to complement data; Designs workflows and procedures.

- Problem Solving - Identifies and resolves problems in a timely manner; Gathers and analyzes information skillfully; Develops alternative solutions.
